

**Remarks**

Applicant respectfully requests reconsideration of the application.

Applicant acknowledges the provisional obviousness type double patenting rejection. However, since the cited application has not been issued as a patent, this rejection remains provisional and does not prevent this application from being issued. Applicant's representative will address the rejection in the application that remains when at least one of the applications has been granted.

The above amendment addresses the indefiniteness rejection. No new matter or new issues have been introduced into the claim as a result of the amendment. Therefore the claims should be in condition for allowance.
